

Getting to Know Our Unique Children of Today

AVAILABLE WORKSHOP

Customized for Parents, Grandparents or Professionals

“Remember, your children are your elders in Universe time. They have come into a more complete, more evolved Universe than you or I can know. We can only see that Universe through their eyes.” —Buckminster Fuller

Children are the preparation of, by, and for the future.

DID YOU KNOW?:

- A British 2002 study found 30% of children in several countries who were given standard I.Q. tests scored in the highly gifted range (previously thought to be less than 1% of the population)
- In that study, the characteristic that was even more noticeable about today’s children was their increased capacity for subtle awareness
- Many children have more sensitive neurological and sensory systems than those of even 20 years ago
- Meaning and integrity are cornerstones of the values many, many young children now hold, so typical reward/punishment methods do not work
- There are innovative approaches and techniques that are much more successful in helping children navigate being in this world—and helping you feel effective and comfortable as a guide to them

THIS WORKSHOP IS FOR YOU IF YOU WOULD LIKE TO

- Gain greater understanding of the needs and gifts of today’s kids
- Move from frustration to ease and confusion to confidence
- Make a true lifetime impact for a child
